Importance: High

SWiFT Stop for all Air Ambulance sites

Dear Teams,

We hope you are all well and managed to get a break over the summer!

We would like to congratulate you all, due to everyone's hard work and support for the SWiFT trial, we have reached our target of 900 participants! This has been completed three months ahead of schedule. So well done, this really is a huge achievement and testament to your commitment to pre-hospital research.

The next steps are:

- We have contacted all the issuing transfusion laboratories and asked them to revert to providing pre-trial standard care boxes.
- If Air Ambulances are currently carrying a trial box and need to use it, they will do so and the participant/s will still be included in the trial. Please complete a pre-hospital form if you receive one, the participant should be consented and data collected as usual.

Once again, thank you for your work and support on the SWiFT trial and we look forward to celebrating this milestone in the journey!

Please do not share this information publicly or on social media at present as NHSBT is preparing a press release.

If you have any questions, please do not hesitate to contact us.

With best wishes, Jo

Joanne Lucas O +
