ADULT HEART TRANSPLANTS

How long do people wait for a heart transplant?

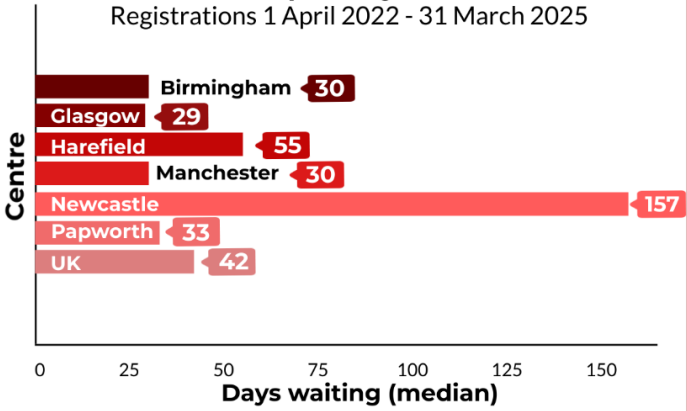

Estimated time from non-urgent registration to transplant by centre

Registrations 1 April 2019 - 31 March 2022

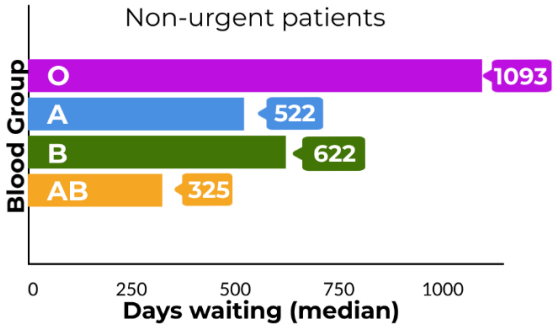

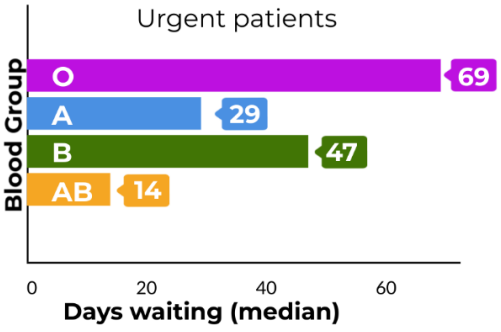

Estimated time from urgent registration to transplant by centre

Registrations 1 April 2022 - 31 March 2025

National waiting time by blood group

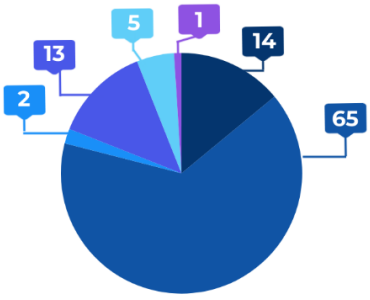

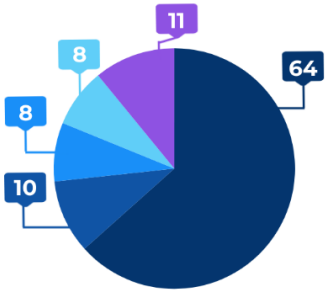

The median is a type of average and is the time when half of patients have received a transplant

Lots of things affect how long you might wait, including your blood group, presence of antibodies and the availability of the right size organs

Nationally, 6 months after going on the non-urgent list

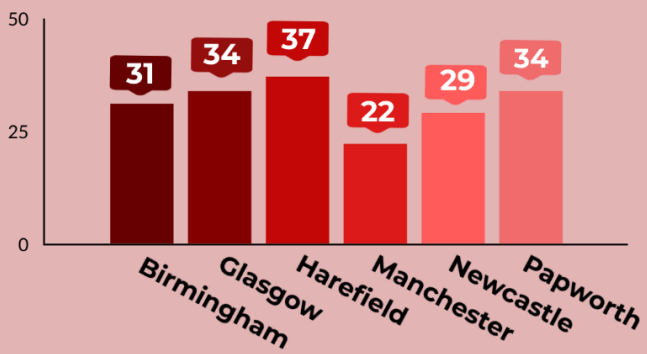

Nationally, 6 months after going on the urgent list

- % transplanted
- % still waiting
- % removed from the list
- % who became urgent
- % who died
- % who became super-urgent

Average number of transplants per year between 1 April 2023 - 31 March 2026

What are the chances of a person surviving for one year after transplant?

On average, **87 out of 100** adult patients are alive after one year following a heart transplant

One year patient survival rate
