ADULT LIVER TRANSPLANTS (ELECTIVE PATIENTS)

How long do people wait for a liver transplant?

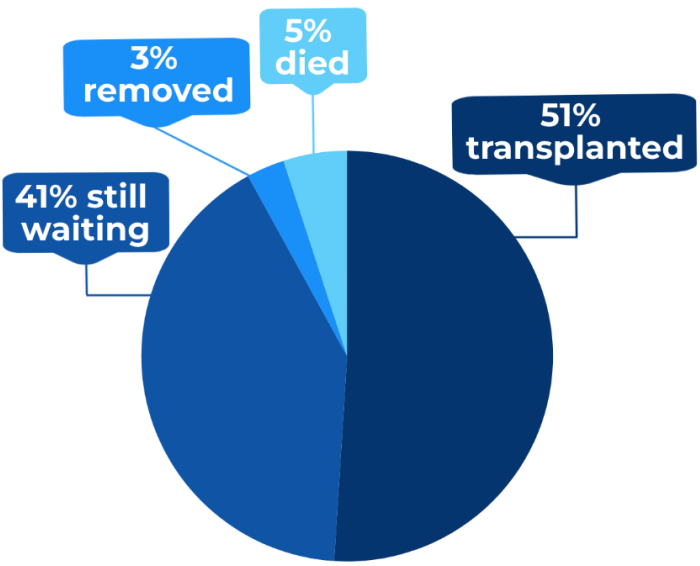

The median is a type of average and is the time when half of patients have received a transplant

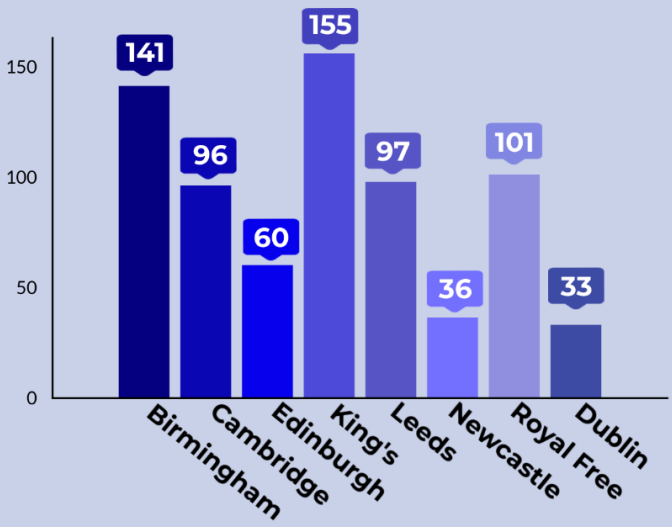

Overall median waiting time to liver transplant for registrations between 1 April 2023 and 31 March 2025 was 130 days, or 4.3 months.

Lots of things affect how long you might wait, including your blood group, your type of liver disease and the availability of the right size organs

Nationally (UK only), 6 months after going on the elective list

Average number of transplants per year between 1 April 2023 - 31 March 2026

What are the chances of a person surviving for one year after transplant?

On average, **95 out of 100** adult patients are alive after one year following elective liver transplant (UK only)

One year survival rate

What are the chances of a person surviving for five years after transplant?

On average, **84 out of 100** adult patients are alive after five years following elective liver transplant (UK only)

Five year survival rate
