ADULT LUNG TRANSPLANTS

How long do people wait for a lung transplant?

Estimated time from non-urgent registration to transplant, by centre 1 April 2022 - 31 March 2025

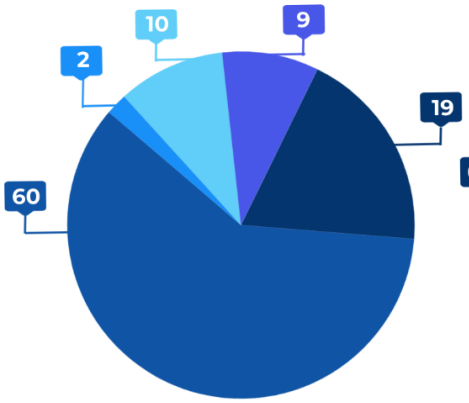

Estimated time from non-urgent registration to transplant, by blood group 1 April 2022 - 31 March 2025

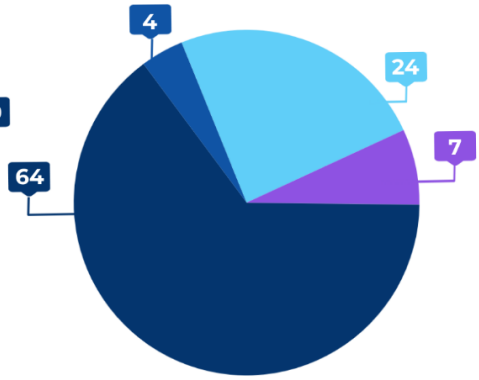

The median is a type of average and is the time when half of patients have received a transplant

Nationally, 6 months after going on the non-urgent list

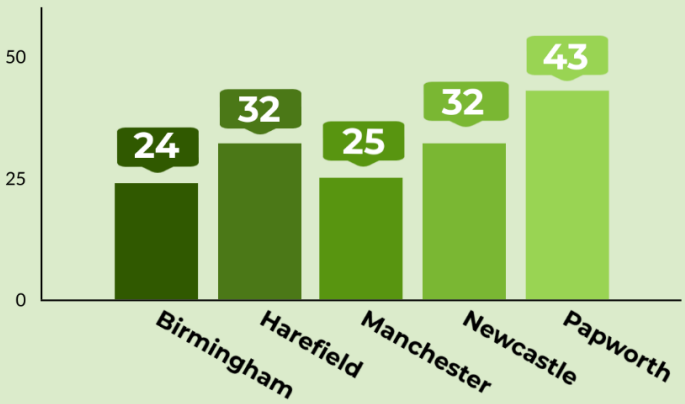

Nationally, 6 months after going on the urgent list

Lots of things affect how long you might wait, including your blood group, presence of antibodies and the availability of the right size organs

- % transplanted
- % still waiting
- % removed from the list
- % who became urgent
- % who died
- % who became super-urgent

Average number of transplants per year between 1 April 2023 - 31 March 2026

What are the chances of a person surviving for one year after transplant?

On average, **83 out of 100** adult patients are alive after one year following a lung transplant

One year survival rate
