<b>Antigen</b>	Varicella Zoster
<b>Use</b>	RhD (and others) Negative control
<b>Clone</b>	VAZO 5
<b>Product Code</b>	9443
<b>Immunoglobulin Class</b>	Human IgG1, lambda light chain

**Clone**

VAZO 5 is a human heterohybridoma derived from the fusion of myeloma cells with EBV transformed B cell line derived from the peripheral blood of an immunised donor. The specificity of VAZO 5 is anti-Varicella Zoster. It can be used as a negative control for those assays not involving Varicella Zoster.
